

# **Input Shaft Repair Kit for ZF Transmissions 6.9 and 7.3 Diesel Engines**

## **KPBZ73HD**

**Includes:**

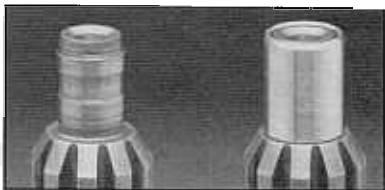

**TZF-73 Input Shaft  
Installation Driver**

**PBZ73HD Pilot Bearing  
and Sleeve**

The Input Shaft Repair Kit eliminates the high cost of disassembling the transmission and replacing the input shaft and front bearing and race. The Kit includes Pilot Bearing with an additional 0.215 wear surface and a high-grade lip seal to

keep the lubrication in and dirt out. The repair sleeve is hardened for more durability. The dual-purpose bearing and sleeve Installation Driver makes the job easy.

- 1. Remove the OEM pilot bearing.**
- 2. Install the new pilot bearing using the Installation Driver with a standard bushing driver handle.**
- 3. Insert the tapered end of the sleeve into the Installation Driver tool. With the bushing driver handle in place, drive the sleeve on to the end of the input shaft until it bottoms out.**
