

YOKE SEAL INSTALLATION TOOL for 350, 375, 700-R4, C4, AOD & AODE

T350-309

1. Notice the four slots on the top of the yoke seal installation tool (Figure 1). Place the yoke seal tines down into the tool.

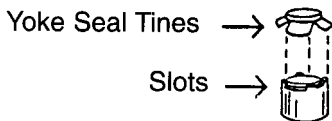

Figure 1

2. Insert the tool with yoke seal attached on the end of a 3/8" extension 6" long.

3. Now push the tool, with seal, into the yoke (Figure 2).

The tool will guide the yoke seal straight down the yoke.

4. Tap the end of your 3/8" extension with a hammer to make final set on the seal.
