

# INPUT SHAFT INSTALLATION DRIVER

**for ZF Transmissions**

**6.9 and 7.3 Diesel Engines**

**TZF-73**

---

Eliminates the high cost of disassembling the transmission to replace the input shaft and pilot bearing. The Installation Driver installs the bearing and the new sleeve to the input shaft. The pilot bearing and sleeve (**Part# PBZ73HD**) are available separately, or in the Input Shaft Repair Kit (**Part# KPBZ73HD**).
